Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

I. Claims 1-13 and 18-22 is, drawn to a Electric Motor Break system classified in class 310, subclass 77.

II. Claims 14-17 is, drawn to a Integral field cup, classified in class 310, subclass 89.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination of the motor/break system as claimed does not require the particulars of the subcombination field cup/shield as claimed. Because, the electromagnetic coil is not required for the motor/break system. The subcombination has separate utility such as a field cup/end shield, for motors with a magnetic core rather than the claim electric core, or in a motor with the break located on the drive end of the motor.
